Education

Bachelor of Technology (B.Tech) in Computer Engineering **2023 - Present**
Pillai College of Engineering, University of Mumbai, Mumbai
Sem 1: 8.00 | **Sem 2:** 7.82 | **Sem 3:** 8.37 | **Sem 4:** 9.14 | **Sem 5:** 8.26 | **Sem 6:** 8.27 **CGPA** : 8.31

10th Grade: 87.20% | Gayatri School | Passed out in 2021 **12th Grade:** 70.83% | BK Birla college | Passed out in 2023

Skills

Programming Languages: C, Python
Databases: MySQL, MongoDB, PostgreSQL, Firebase Firestore
Tools (Basic)**:** Git, Docker, Jenkins, VS Code, IntelliJ IDEA, Cursor
Web Technologies: HTML5, CSS3, React.js, Next.js,
Operating Systems: Windows
Soft Skills : Team Collaboration, Leadership and Mentoring, Communication, Time Management, Problem-Solving, Adaptability

Projects

Trove – Secure Family Document Vault **June 2026**
Developed a secure document management system with metadata-driven organization, document lifecycle operations, and expiry tracking workflows.
Built backend APIs for secure document upload, retrieval, metadata updates, and persistence using Fastify, PostgreSQL, and Cloudflare R2.
Implemented biometric authentication, encrypted offline caching, and push notification integration to improve secure document access and user experience.
Fixed production backend, API, navigation, synchronization, and metadata persistence issues to improve application stability..
Type: self. *Technology Used*: Flutter, Dart, Node.js, Fastify, PostgreSQL, Cloudflare R2

Tradox – AI-Powered Stock Prediction Platform **May 2026** (ongoing)
Designed a modular machine learning pipeline for stock prediction, including feature engineering, model training, ensemble inference, and prediction generation.
Built a prediction engine that combines model outputs, market indicators, and sentiment signals to generate confidence-based trading predictions.
Developed scalable training and inference workflows with model versioning, ONNX deployment, and automated performance monitoring.
Type: Self. *Technology Used*: Python, FastAPI, PyTorch, LightGBM, ONNX Runtime, SQLite, WebSocket

Internships

Research Intern **Jan 2026 – Mar 2026**
Company Name*:* Suvidha Foundation, mode: online, type : unpaid
Performed comparative evaluation of BART, PEGASUS, and LED for Indian English news summarization through literature review, experimentation, and reproducible research documentation.
Technology Used: Python, BART, PEGASUS, LED, LaTeX (Overleaf), Git, GitHub, Google Colab, ROUGE

Courses & Certifications

Google DeepMind: Train A Small Language Model| Google Skills | April 2026
Transformer Models and BERT Model| Google Skills | April 2026

Achievements & Positions

- **Position:** Videography Head, Computer Society of India, Pillai college of Engineering | Aug 2025- Present
  Achievement: Led videography and visual content production for technical events, managing event coverage, promotional videos, and post-production editing.
