EXPERIENCE

Machine Learning Intern | Suvidha Foundation
• Implemented and analyzed transformer-based NLP models for Indian news summarization.
• Worked on preprocessing, multi-document input construction, and ROUGE-based evaluation.
• Contributed to research paper drafting and comparative model analysis.

PROJECTS

ATSCORE – AI-Assisted Resume Matching System (Live)
• Built an NLP-based system to compute ATS-style resume compatibility scores.
• Implemented keyword extraction, skill normalization, and semantic matching logic.
• Designed an end-to-end text analysis and scoring pipeline.

PDFUTILS – ML-Assisted Document Processing Platform (Live)
• Developed a document processing system with NLP-oriented preprocessing workflows.
• Implemented text extraction, cleaning, and structuring for downstream ML use.
• Designed modular pipelines to support scalable AI-driven document analysis.

PORTFOLIO WEBSITE – personal portfolio website (Live)
• Designed and deployed a personal AI/ML portfolio platform to host and demonstrate applied machine learning and NLP projects.
• Integrated live demos, project documentation, and system-level explanations for ML workflows and evaluation results.

TECHNICAL SKILLS

Programming: Python. Basic SQL, JavaScript (for ML system integration)
Machine Learning: NLP, Text Similarity, Model Evaluation, Supervised Learning, Train / Validation / Test Splits, Keyword Extraction, Feature Engineering, Classification,Regression
Libraries: Transformers, Scikit-learn, Pandas, NumPy, PyTorch (model fine-tuning & inference), ROUGE Evaluation Library
Tools: Git, GitHub, Google Colab, VS Code

EDUCATION

Bachelor of Engineering in Computer Engineering
Pillai College of Engineering, Panvel
CGPA: 8.32 / 10 | 2023 – 2027

ACHIEVEMENTS

• Qualified the internal round of Smart India Hackathon 2025 (SIH), advancing to the next selection stage

CERTIFICATIONS

• Introduction to Generative AI – Google
• Machine Learning Foundations — Google Cloud Skills Boos
